

Jason Urbina

Software Engineer

Professional Summary

I'm Jason Urbina — a Senior Software Engineer and UI Architect with a strong foundation in computer science, a sharp eye for design consistency, and a habit of elevating every engineering team I'm a part of. I specialize in building modular, scalable front-end systems with clean architecture and smart UX — the kind that balances polish with performance.

What sets me apart is my ability to pilot modern AI tooling with surgical precision. In a world of "vibe coding," I bring thoughtful guidance and engineering discipline, using AI not as a crutch but as an accelerator. Whether I'm leading internal tooling development, mentoring juniors, or translating high-level design into pixel-perfect builds, my focus on real solutions shines through.

Experience

Jan 2023 – Present

Tech In SF | San Francisco, CA

IS Division Manager / Senior Software Engineer

- Built and led Tech In SF's first internal engineering team — designers, engineers, and QA — launching a new product division and revenue stream.
- Created standardized SOPs and tech stack selection processes aligned with project needs and best practices.
- Integrated AI tools into dev workflows (prompt chaining, QA bots, internal copilots), cutting project time-to-delivery by 50%.
- Developed a Webflow-based design system and templating engine for rapid client site deployment.
- Created internal tooling for timekeeping, hardware order automation, and client intake workflows using Google Workspace and custom scripts.
- Interviewed and trained engineers with a focus on mentorship, documentation, and ramp-up efficiency.

Jun 2020 – Jan 2023

Samsung Research America | Mountain View, CA

Prototyping Engineer

- Delivered interactive prototypes using Vue and React, bridging system architecture with UX goals.
- Collaborated across engineering and design to maintain experience integrity under real-world constraints.
- Conducted usability testing and refined components based on data-driven insight.

Jan 2020 – Jun 2020

Kaiser Permanente | Pleasanton, CA

UI Developer

- Built and tested ADA-compliant React components (Hooks, Redux) for Self-Service initiatives.
- Delivered clean, version-controlled code in Git while collaborating in Agile teams.

Jul 2019 – Jan 2020

Accenture | San Francisco, CA

Senior Full-Stack Developer

- Delivered React-based solutions across multiple enterprise clients.
- Documented systems and mentored junior team members to maintain development cadence.

Dec 2018 – Jul 2019

Williams Sonoma | San Francisco, CA

Principal Front-End Developer

- Developed core components for Search UI using atomic principles and shared libraries.
- Helped set new standards for frontend and design collaboration.

Technical Skills

Languages & Frameworks:

Modern JavaScript (ES2023+), TypeScript, HTML5, CSS3, SASS, Python, Vue (incl. Nuxt), React (incl. Next), Angular, Node.js, PHP (as needed), GraphQL

Architecture & Tooling:

RESTful APIs, Webpack, Vite, Postman, Docker, Kubernetes, Nx (monorepo architecture), Git, GitHub, GitLab, Bitbucket, NPM, JSON, XML, ORM (JavaScript-based), CI/CD (Jenkins, GitHub Actions, GitLab CI, Azure DevOps, AWS Pipelines)

AI & LLM Integration:

Prompt Engineering, GitHub Copilot, ChatGPT, Claude, DeepSeek, Gemini, Grok, Proximity, Manus, Flux, Stable Diffusion models, WAN/Kling/HuanYuan video generation, RunPod + Google Cloud GPU VM workflows, local API agents, MCP agentive platforms

Testing & QA:

Jest, React Testing Library, Karma, Jasmine

UI Systems & Styling:

Atomic Design, CSS-in-JS (React + Vue), Tailwind, Material UI, Bootstrap, Google Web Components, Storybook, Figma-to-Code plugins, BEM methodology

Cloud & Platforms:

AWS, GCP, Azure, Docker, Kubernetes, Webflow

Team & Workflow Tools:

Agile/Scrum, Jira, Notion, Linear, Miro, Motion, Figma, Sketch, InVision, Chrome DevTools (network profiling, viewport emulation, performance auditing)

Education

Software Design and Development

Golden State Institute of Technology
2010

Sound Design and Motion Graphics
Studies

Expression College for Digital Arts
2008 – 2010

Previous Experience (Condensed)

Jun 2018 – Dec 2018

Potato | Senior Full-Stack Developer

Built UI components in Vue; enforced accessibility standards under strict QA.

Oct 2017 – Jun 2018

GDIT | Senior Front-End Developer

Angular-based FAFSA mobile app; led validation, modals, and style refactors.

Jun 2017 – Oct 2017

Moody's Analytics | Senior Front-End Developer

Angular CRA UI modules; ngRX state management and Material UI integration.

Apr 2017 – Jun 2017

NextAxiom | Senior Front-End Developer

Built Admin modules; integrated SOAP services; upgraded ES5 to TypeScript.

Mar 2017 – Apr 2017

Viscira | Senior Front-End Developer

Angular-based iPad apps using Veeva CMS; handled state and templating logic.

Jun 2016 – Feb 2017

Delta Dental | Lead Front-End Developer

ADA rework of core systems; led GitFlow and front-end code reviews.

Jan 2016 – May 2016

Freelance (Fiverr, Camp Creative)

Commission-based UI builds using Angular, HTML/CSS, and JS.

Jun 2015 – Dec 2015

Apple | Publishing Developer

Apple Store content updates; wrote reusable SASS mixins; supported localization.

Dec 2014 – Jun 2015

Ericsson | Design Developer

Built responsive components; set CSS/LESS partial standards.

Oct 2013 – Dec 2014

Liberation Technologies | Front-End Developer

Built animated SPA using Angular and parallax UI patterns.

Nov 2012 – Sep 2013

Junaroo | UI Engineer

Built mobile prototypes; maintained and documented LESS codebase.

Jun 2010 – Oct 2012

One Team Technologies | Front-End Developer

Delivered internal SPAs; created custom e-commerce modules using Angular.
